

# Street Smart

## Street Center

---

### KEY FEATURES

- Take your team collaboration to the next level
  - Unified platform for team communication and collaboration
  - Robust calendar sharing and task center enables open collaboration between teams
  - Eliminate the gap between project planning and execution
  - No more emails or searching for attachments and never miss a deadline
  - Work and personal status updates from anywhere
- 

Collaboration is a central factor for project success. In times of international projects and virtual team environments, collaboration is more important than ever. Street Center helps to overcome geographical boundaries in order to achieve collaboration.

### Dynamic Collaboration

Street Centre is a collaboration board where teams can communicate, provide updates and manage their day at work. Every project has a dedicated Street Centre site, which is automatically created once you create a project. Departments, divisions and practices can also have their own dedicated Street Centre sites.

Street Center assists organizations better align resources as needed, increase efficiency and effectiveness, and make the results more sustainable. Street Center has brought an unprecedented way for organizations to share knowledge and expertise, and to better integrate business, work, or learning processes; it is also been a key element in supporting organizational transformation.

## Kanban Task Board

Task Centre is one of the key components of the Street Centre where tasks are displayed on a Kanban board along with a timeline view. Team members can view, plan and execute tasks while collaborating and communicating with other team members.

## Frames & Stickies

Street Board is a subset of the Task Centre where members can create frames and sticky notes for urgent issues, risks, checklists and discussions. These frames can be linked to the tasks assigned and members can be tagged for open and better collaboration.

## Shared Scheduling

Street Centre scheduling provides a robust calendar sharing functionality between various teams. You can drag and drop resources with whom you want to share your calendar. The shared calendar includes daily, weekly, monthly schedules including tasks, appointments and meetings.
